

# Fat grafting the buttock: fact and myths

BY JAMES D FRAME

## CPD Feedback form

Please print out our questionnaire, complete the questions below and sign.

Keep for your records.

1. A recognised risk of liposuction is fat embolism.
  - true
  - false
  
2. Del Vacchio showed that fat injected under pressure into the gluteus maximus muscle will dissipate into:
  - the subgluteal space
  - the obturator fossa
  - the pelvic floor
  - burov's triangle
  - inguinal lymph nodes
  
3. The subgluteal fold represents:
  - the lower free border of gluteus maximus
  - the level of the hip joint
  - the suspensory ligament of the perineum
  - anterior free border of tensor fascia lata
  - the junction of gluteus medius and gluteus minimis
